samples highlighted in yellow are related to the former storage tank in the transformer pit. The liquids were removed and disposed during the cleaning process

a/ µg/l = micrograms per liter, µg/kg = micrograms per kilogram, EB = Equipment Blank, TP = Transformer Pit, LIQ = Liquid;

U = Analyte not detected above reporting limit (RL);

J = Analyte is less than the RL but greater than or equal to the MDL and the concentration is an approximate value;

NA = Not analyzed

* = LCS or LCDS is outside acceptance limits

b/ Result reported in µg/kg;

c/ Total PCBs are the sum of detectable concentrations of the individual aroclors.
